Hello Folks:

We're proud of our new 1958 Fall Catalog. True, it isn't the biggest in the country but we don't feel there are that many items you can safely fall plant. We could make up a catalog 5 times as big by listing such things as roses, fruit trees, shade trees, shrubs, etc. We have them too, but experience (92 years) has taught us that most of these items just don't take kindly to a fall planting north of central Iowa and central Nebraska. We want you for a customer not just ONCE but for YEARS TO COME.

You can depend on the stock listed on the next 8 pages to be varieties you can SAFELY FALL PLANT. Try them and see for yourself.

BLAZ-O-MUMS

The Plants of 1000 Blossoms

Be certain to plant the miracle mums that start blooming the very first year. In late summer and early fall they are completely covered with beautiful flowers. It is not uncommon to see many Blaz-O-Mums 3 feet across and 2 feet high and just covered with flowers so solid and thick that no foliage shows. By actual count, over 1,000 blooms on some plants the first year and even more the second. Do well everywhere.

These particular varieties have been chosen because they bloom early and with a normal spring, should produce flowers for Decoration Day.

This collection will make a fine cemetery planting or add a lot of beauty to your own home grounds. Peonies are one of the easiest to grow of all flowers and should be included in all plantings.

HOW and WHEN WE SHIP

We will be able to ship practically all of the bulbs, strawberries, evergreens and perennials listed in this catalog from about September 10th until the end of the fall planting season.

Such items as raspberries and those few others that require a fall ripening period, will follow as soon as conditions will permit.

The best thing for you to do, is place your order as soon as possible after you have received this catalog. You can depend on us sending your stock at the earliest, safe planting date for your locality.

We Are as Near as Your Mailbox

No other method of buying nursery stock offers you the advantages of buying from Gurney's by mail. Where else would you have such a selection to choose from—so many of the latest and best introductions in the seed and nursery industry or at such a low price? Speaking of price, our low price is made possible only because of our method of selling plus the fact that we raise most all of our nursery stock right here at Yankton. You don't pay any agent's commission or middleman's profit. You buy direct and you save.

Gurney's have been in business for over 90 years and over 60 of those years have been right here at Yankton. The only comparable soil to our bottom lands along the mighty Missouri river here at Yankton is said to be the Valley of the Nile. Yankton is the home of the gigantic Gavins Point Dam which forms the huge Lewis and Clark Reservoir. This makes one of the finest recreation lakes in America—a lake over 40 miles long. We are only about 200 miles from the geographic center of North America. This makes us ideally located to serve the entire country by mail.

It's easy to shop by mail from Gurney's—right in the comfort of your living room. That's why we are as close to you as your mailbox.

FREE GIFT

It always has and always will take a lot of old-fashioned courtesy to maintain a friendly business. That is the reason we include a free gift with every order we receive no matter how small it might be. We can't tell you what that gift is going to be, but we know you will enjoy it. This is our way of saying "thank you" for your fine order.

Gurney's Nursery Stock Is GUARANTEED

We guarantee all our nursery stock to be state inspected, free from disease, true to name, and first class in every way.

Examine the nursery stock carefully when you receive it. If you are not pleased with it in every way, return it promptly at our expense and we will replace it at once, or refund your money in full, whichever you prefer.

After you have planted it if it fails to grow owing to weather conditions or other factors over which we have no control, we will adjust for those losses once by issuing a credit for one half (50%) of the original purchase price providing your loss is reported to us not later than August 1, 1959.

It's Easy to Make a Gurney Lawn

STEP NO. 1

Preparation of the ground is important. First, plow or spade deeply. Level off the area to be planted and rake to remove sticks, trash, stones, or lumps.

STEP NO. 2

Roll the lawn thoroughly. This allows you to plant the seed more evenly, plus providing a firmer seed bed.

STEP NO. 3

Sow the seed, generally using 1 lb. of lawn seed to every 225 sq. feet.

STEP NO. 4

Rake carefully to work the seed slightly into the soil.

STEP NO. 5

Again roll your lawn, using a roller or packer. This is important. Keep it well watered (each day) for the next 2 or 3 weeks. Moisture is necessary for proper germination.

Gurney's HARDY PERENNIAL FLOWERS

Finest FIELD-GROWN PLANTS

For Years of Lasting Beauty

All our perennials are fresh-dug from our own fields, carefully packed to arrive in perfect condition. Order now.

Plant perennials so you will have flowers year after year. Gurney's perennials are hardy, field-grown plants that will thrive and do well. These plants come up each spring, growing bigger and more beautiful each year. Plant them this fall and they will be in the ground

to start growing at the earliest growing weather next spring. Ready for shipment in September and October.

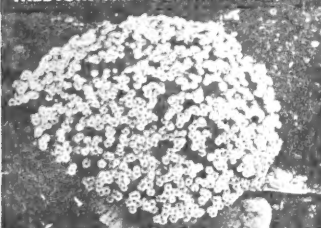

How Tall Do They Grow?

In planting perennial flowers, their proper location as far as height is concerned, is very important. Nothing is more disgusting than to have low growing flow-

ers hidden from view just because tall ones were unknowingly planted in front of them. No need for this happening to you.

This year we have separated all of our perennials into 3 groups. Low, medium and tall growing. This makes it easier for you to plan your flower bed. Use low growers in front, tall in the background and medium growers between.

Hardy EVERGREENS from GURNEY'S

HOW WE SHIP EVERGREENS

B&B Means Balled & Burlapped

All evergreens listed as "B&B" are well-shaped specimen trees dug with their roots still in a solid ball of rich earth and then wrapped in burlap, just as they have been growing in the nursery. This is the best way to buy evergreens, but they must be shipped Express Not Prepaid.

R.W. Means Root-Wrapped

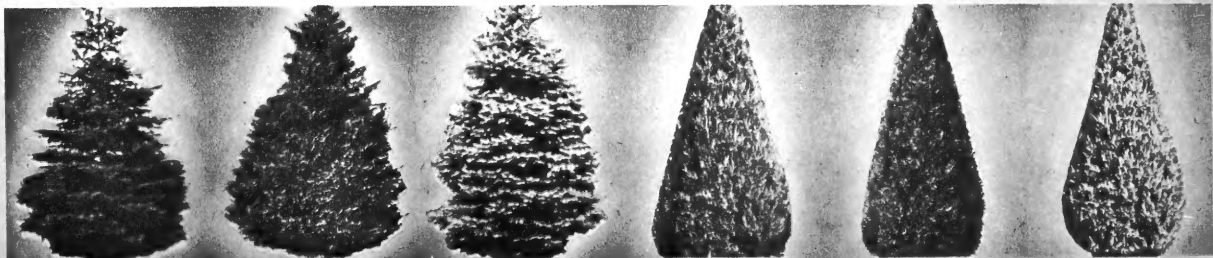

All evergreens listed "R.W." are freshly dug specimen trees. The roots are "puddled" in mud as soon as dug and each tree is individually wrapped in wet moss. These Root-Wrapped trees are all sent to you postpaid. The easier method of digging R.W. trees means a saving to you as you will see by our special R.W. prices. Water all evergreens thoroughly after planting.
